

# Immulina<sup>®</sup> + *D<sub>3</sub>* *Capsules*

## Short Product Characteristics

There are periods in a person's life when taking care of immunity is particularly important. These are the period of early childhood when the immune system is still maturing, and the period of advanced adulthood when our immune system begins to age and immunity no longer functions as efficiently as before. In addition, the efficiency of the immune system is affected by lifestyle, diet, medications used, stimulants taken and the environmental conditions in which we live and work.

Two capsules of Immulina+D<sub>3</sub> provide vitamins (C and D<sub>3</sub>) and minerals (zinc and selenium) necessary for the proper functioning of the immune system, in an amount that covers the average daily requirement of an adult. Immulina also provides rutosides (hesperidin and rutin) from Acerola Fruit Extract with beneficial effects on blood vessels and mucous membranes.

Two special Immulina ingredients: lipopolysaccharide from spirulina extract (LCEPEEN) and beta-glucan from baker's yeast extract ( $\beta$ -1,3/1,6-D-glucan) with stimulating and strengthening immune system. These ingredients have been comprehensively tested in the best medical centres of the US and Europe. They are completely safe and activate the entire immune system, preparing it for rapid and effective action.
